

Hot Water Generation

Customer: Gorton's Seafood

Location: Gloucester, MA

Scope of Work: Armstrong International engineered, designed, and installed a process hot water system for Gorton's Seafood plant expansion.

- Upgrade Projects:**
- Installed a 4,000,000 Btu Armstrong Flo Direct® Complete Thermal Exchange (CTE) water heater
 - Installed transfer pumps
 - Installed FRP 1,500 gallon storage tank
 - Installed a pressure booster pump system with manual start-stop controls
 - Installed all required auxiliary piping
 - Installed six wash station drops and hose reels

Investment: The value of the agreement was \$140,000.

Terms: Project was completed in September 2003.

Benefits: Gorton's site management wanted to concentrate on the requirements of the plant expansion and welcomed Armstrong turnkey capabilities. Further, Gorton's received a hot water heating system that is 98% efficient.
