

Steam System Optimization

Customer: Rohm & Haas

Location: Deer Park, TX

Scope of Work: Multi-year management to maintain and optimize the 4,000 steam traps on-site at this facility. Responsibilities include steam trap analysis, repair/replace recommendations, database management, work order scheduling, steam loss reporting, and general steam/condensate system upgrade recommendations.

Terms: This agreement began in 2001, and has continued via a three-year renewable term.

Benefits: Rohm & Haas has recognized energy savings as a result of dedicated personnel changing traps quickly when failure has been recognized.
