

Easy Install

Customer: Suzhou Capsule Co., Ltd.

Location: Suzhou, P.R. China

Scope of Work: Suzhou Capsule Co., Ltd. is the largest hollow capsule manufacturer in China. All manufacturing processes are automatically controlled. Product quality relies heavily on strict indoor cleanliness, indoor air temperature, and humidity control, along with other process controls.

The humidifiers originally designed to come along with the central air conditioning cabinet turn out to be too complicated to install.

Upgrade Projects: After a complete humidity solution evaluation, eighteen Armstrong series 1100 humidifiers and four Armstrong series 9000 steam injection humidifiers were selected.

Terms: The products were installed in 2005.

- Benefits:**
- Armstrong steam humidifiers offer convenient installation, reliable performance, and need almost no maintenance.
 - Armstrong series 1100 stainless steel steam humidifiers resist corrosion very well and are suitable for sensitive environments that need clean humidification.
