TVS 4000 Assembly Components

1. TVS 4000 cast stainless steel connector block
2. Trap inlet isolation valve
3. Trap outlet isolation valve
4. Full port needle style test valve
5. Armstrong 2011 all stainless steel inverted bucket steam trap

Gate and globe valves have exposed rising stems which can corrode and gather dirt which tears stem packing and causes steam leaks.

Piston valve has enclosed non-rotating rising stem which protects the stem from corrosion and dirt.

3 year guarantee against defective materials or workmanship.

Overall length greater than 30 inches (762 cm)

Overall face to face less than 5 inches (127 mm)
